

Roof Crossbar Fitting Instructions

**Before You Start Please Ensure You Have Read & Understand
These Instructions**

**We recommend you check out our website for photos and
more instructions**

<http://www.van-x.co.uk/instructions>

- Carefully Unpack the Contents of the package
- Gently position the roof bar on the vehicle if necessary you can cut down the size
(To Cut the bar to size gently pull the end off and cut away the excess metal
and refit the end)
- Gently remove the caps covering the holes on the roof for the desired position
- Screw the bar using the provided nuts making sure that the rubber bass is in place
and repeat on the other side

(You can also put some silicone sealant under the bar to improve the seal
and prevent any leaks)

- Repeat this process for all bars purchased

If You Still Have A Problem/Difficulty Fitting Your Bars
