***** PLEASE ENSURE YOU HAVE THE CORRECT BONNET BRA FOR YOUR VEHICLE *****

1. First of all, open and raise your bonnet halfway. (It is easier if you have someone to assist you).
2. Attach the corners closest to the windscreen first.

PLEASE **DO NOT** PULL TIGHT ON THE CORNER OF THESE BONNET BRAS

3. Slowly and carefully stretch the bonnet bra into position, towards the headlamp corners.

4. At this point, the cover should be fitted loosely.

5. Fully open the bonnet and use the bonnet stay (if fitted).

6. You will see the fabric loops starting from one corner. Attach the supplied rope from one bottom corner (Windscreen End) and zig-zag the rope between the other loops.
– **DO NOT PULL TOO HARD!**

7. Once you have finished looping the rope temporarily, tie the rope and gently close your bonnet.

8. Apply hot water to the bonnet bra (Please Do Not Burn Yourself) as the heat will help the bonnet bra soften and become more flexible, if required.

9. Now re-open your bonnet using the bonnet stay (if fitted).

10. Gently tighten the rope from where you initially started and tie again, if necessary. Once again, **do not pull hard** on the loops, as they are not designed to be used for stretching the bonnet bra. The bonnet bra should be soft enough to pull gently by the edges.

11. Again, close your bonnet but only halfway, making sure you are satisfied with the fit and that the rope is tied securely and out of the way.

12. Now fully close your bonnet as you normally would and apply hot water. This will help the bonnet bra to fit snugly.

13. Dry the bonnet with a soft cloth or chamois.

14. Apply wax or tyre shine products to help protect your bonnet bra, giving it a nice finish.

15. Well Done! You have successfully fitted your bonnet bra.
